

Pennsylvania Safety Threats

	Safety Threats	Explanation	Criteria
1	Caregiver(s) intended to cause serious physical harm to the child.	In order to meet this criterion, a judgment must be made that the acts were intentional; the objective was to cause pain and suffering; nothing or no one in the household could stop the behavior; or there is no remorse.	<ul style="list-style-type: none"> Caregiver(s) wants to inflict pain and/or injury to teach the child a lesson; discipline is not the primary reason. The nature of the incident or use of an instrument can be reasonably assumed to heighten the level of pain or injury (e.g., cigarette burns). Caregiver(s) do not acknowledge any guilt or wrongdoing and they intended to harm the child. Caregiver(s) may feel justified, may express the child deserved it and they intended to hurt the child. Caregiver(s) can reasonably be assumed to have had some awareness of what the result would be prior to the incident.
2	Caregiver(s) are threatening to severely harm a child or are fearful that they will maltreat the child.	The threat to severely harm or expressed anxiety is sufficient to conclude that the caregiver might react toward the child at any time and it could be in the near future.	<ul style="list-style-type: none"> Caregiver(s) state they will maltreat. Caregiver(s) threats are plausible, believable; may be related to specific provocative child behavior. Caregiver(s) talks about being worried about, fearful of, or preoccupied with maltreating the child. Caregiver(s) are distressed or "at the end of their rope," and are asking for some relief in either specific (e.g., "take the child") or general (e.g., "please help me before something awful happens") terms. Caregiver(s) describes disciplinary incidents that have become out of control and are threatening or fearful that this behavior will be repeated.
3	Caregiver(s) cannot or will not explain the injuries to a child.	Caregivers are unable or unwilling to explain maltreating conditions or injuries which are consistent with facts. An unexplained serious injury or condition is a present danger.	<ul style="list-style-type: none"> Caregiver(s) acknowledge the presence of injuries and/or conditions but plead ignorant as to how they occurred. Caregiver(s) express concern for the child's condition but are unable to explain it. Caregiver(s) accept the presence of injuries and conditions but do not explain them or seem concerned. History and circumstantial information are inconsistent with the caregivers' explanation of the injuries and conditions. Caregivers' verbal expressions do not match their emotional responses and there is not a believable explanation. Facts related to the incident, injury, and/or conditions contradict the caregivers' explanations.
4	Child sexual abuse is suspected; has occurred; and/or circumstances suggest abuse is likely to occur.	Child sexual abuse always presents serious harm to the child. The safety concern relates to whether or not the sexual abuse is imminent.	<ul style="list-style-type: none"> Caregiver(s) do not believe the children's disclosure of sexual abuse even when there is a preponderance of evidence and this affects the children's safety. Sexual abuse has occurred in which family circumstances, including opportunity, may be consistent with sexual abuse. Caregiver(s) deny the abuse, blame the child, or offer no explanation or an explanation that is unbelievable. Child sexual abuse is suspected and circumstances suggest continued abuse is likely to occur Alleged perpetrator or perpetrator has access to child. Caregiver(s) or others with access to the child have forced or encouraged child to engage in sexual activities. Non-offending caregiver(s) is unable or unwilling to prevent the alleged perpetrator, perpetrator, or known sexual offender from having access to the child. Caregiver(s) cannot control their sexual impulses.

Pennsylvania Safety Threats

5	Caregiver(s) are violent and/or acting dangerously.	This threat includes both behaviors and emotions which may be immediately observable, frequently occurring or may occur in the future.	<ul style="list-style-type: none"> Violence includes hitting, beating, physically or verbally assaulting a child or other family member. Violence includes acting dangerously toward a child or others including throwing things, taunting weapons, driving recklessly, aggressively intimidating and terrorizing. Family violence involves physical and verbal assault on a parent in the presence of a child; the child witnesses the activity and is fearful for self and/or others. Family violence is occurring and a child is assaulted; attempting to intervene; and/or inadvertently harmed even though the child may not be the actual target of the violence. Caregiver(s) who is impulsive, exhibiting physical aggression, having temper outbursts or unanticipated and harmful physical reactions (e.g., throwing things). Caregiver(s) whose behavior outside of the home (e.g., drugs, violence, aggressiveness, hostility) creates an environment within the home which threatens child safety (e.g., drug parties, drive-by shootings).
6	Caregiver(s) cannot or will not control their behavior.	This threat concerns with the lack of caregiver self-control which jeopardizes the safety of the child.	<ul style="list-style-type: none"> Caregiver(s) is acting bizarrely, delusional, and/or experiencing hallucinations Caregiver(s) is under the influence of some substance or is chemically dependent and unable to control the effects of the addiction. Caregiver(s) is seriously depressed or unable to control emotions or behaviors and is functionally unable to meet the children's basic needs. Caregiver(s) makes impulsive decisions and plans which leave the children in unsafe situations (e.g., unsupervised, supervised by an unreliable caregiver). Caregiver(s) is emotionally immobilized, chronically or situationally (e.g. paralyzed by fear). Caregiver(s) has addictive patterns or behaviors (e.g., addiction to substances, gambling or computers) that are uncontrolled and leave the children in unsafe situations (e.g., failure to supervise or provide other basic care).
7	Caregiver(s) reacts dangerously to child's serious emotional symptoms, lack of behavioral control, and/or self destructive behavior.	Caregiver(s) can be so provoked by the child's behavior that they react dangerously. The child's behavior is so out-of control that the caregivers cannot safely manage it.	<ul style="list-style-type: none"> Child is... <ul style="list-style-type: none"> confrontational, insulting or challenging, highly aggressive and acting out repeatedly, threatens to run away, abuses substances... so that caregivers lose patience, impulsively strike out at the child, isolate the child, or totally avoid the child in an extreme manner.
8	Caregiver(s) cannot or will not meet the child's special, physical, emotional, medical, and/or behavioral needs.	The needs of the child are acute and require immediate and constant attention by the caregiver(s). The attention and care is specific and can be related to severe results when left unattended. Imminence is obvious. Severe effects would be immediate.	<ul style="list-style-type: none"> Caregiver(s) does not seek treatment for child's immediate and dangerous medical conditions. Caregivers' failure to give prescribed medication endangers the child's life or causes their conditions to worsen. Child complains of extreme pain and the caregiver(s) does not seek medical or dental attention. Child is suicidal, is self-mutilating, or is exhibiting other harmful behaviors (e.g. substance abuse), but the caregiver(s) will not take protective action. Caregiver(s) expectations of the child are totally unrealistic in view of the child's condition. Child is a physical danger to others. Child's basic needs exceed normal expectations because of unusual conditions (e.g., disabled child) and the family is unable to adequately address those needs.

Pennsylvania Safety Threats

9	Caregiver(s) in the home are not performing duties and responsibilities that assure child safety.	This refers only to adults (not children) in a caregiving role. Duties and responsibilities are at a critical level that if not addressed represent a specific danger or threat is posed to a vulnerable child. The lack of meeting these basic duties and responsibilities could result in a child being seriously injured, kidnapped, seriously ill, even dying.	<ul style="list-style-type: none"> Caregiver is unable to perform basic care, duties or fulfill essential protective duties. Caregiver(s) is incapacitated, incarcerated, hospitalized, on vacation, absent from home, or current whereabouts are unknown. Caregiver(s) does not attend to the child; the need for care goes unnoticed or unmet (e.g., child wanders outdoors alone, plays with dangerous objects, plays on unprotected window ledge, or is exposed to other serious hazards). Caregiver(s) leaves child alone, not considering length of time alone and child's age/development. Caregiver(s) leaves child with other inadequate and/or inappropriate caregivers. Caregiver(s) is unable to care for the child due to trauma of recent assault or repeated incidents of violence. Caregiver(s) has abandoned the child
10	Caregiver(s) lack of parenting knowledge, skills, and/or motivation presents an immediate threat of serious harm to a child.	This refers to basic parenting that directly affects a child's safety. This extreme inability and/or unwillingness to meet basic needs creates child safety concerns.	<ul style="list-style-type: none"> Caregiver(s) does not know what basic care is or how to provide it (e.g., how to feed or diaper, how to protect or supervise according to the child's age). Caregiver(s) expectations of the child are unrealistic and far exceed the child's capacity thereby placing the child in unsafe situations. Caregiver(s) avoids parenting and basic care responsibilities. Caregiver(s) does not know or does not apply basic safety measures (e.g., keeping medications, sharp objects, or household cleaners out of reach of small children). Caregiver(s) place their own needs above the children's needs thereby affecting the children's safety. Living conditions severely endanger the child.
11	Caregiver(s) do not have or do not use resources necessary to meet the child's immediate basic needs which presents an immediate threat of serious harm to a child.	The lack of resources must be so acute that their absence could have an imminent severe effect on a child. The absence of these basic resources could cause serious injury, serious medical or physical health problems, starvation, or serious malnutrition.	<ul style="list-style-type: none"> Family has no food, clothing, or shelter. Family finances are insufficient to support needs (e.g. medical care) that, if unmet, could result in a threat to child safety. Family is routinely using their resources for things (e.g., drugs, electronics, vacations) other than their basic care and support thereby leaving them without their basic needs being adequately met.

Pennsylvania Safety Threats

12	Caregiver(s) perceive child in extremely negative terms.	“Extremely” is meant to suggest a perception which is so negative that, when present, it creates child safety concerns. In order for this threat to be checked, these types of perceptions must be present and the perceptions must be inaccurate.	<ul style="list-style-type: none"> • Child is perceived to be the devil, demon-possessed, or evil. • Caregiver(s) perception of the child is extremely negative e.g. deformed, ugly, deficient, or embarrassing. • Caregiver(s) perceive the child as having taken on the same identity as someone the parent/caregiver hates, is fearful of, or hostile towards; and the parent/caregiver transfers feelings and perceptions of the person to the child. • Child is considered by caregiver(s) to be punishing or torturing them. • Caregiver(s) is jealous of the child and believes the child is a detriment or threat to the caregiver(s)' relationship and stands in the way of their best interests. • Caregiver(s) sees child as an undesirable extension of self who needs purging or punishing. • Caregiver(s) sees the child as responsible and accountable for the caregiver's problems; blames the child; perceives, behaves, acts out toward the child as a result based on a lack of reality or appropriateness because of their own needs or issues.
13	Caregiver(s) overtly rejects county agency intervention; refuses access to a child; and/or there is some indication that the caregivers will flee	The rejection is far more than a failure to cooperate, open anger or hostility about county agency involvement or other signs of general resistance or reluctance. This safety threat applies also when there are indications that a family will change residences, leaving the jurisdiction, or refusing access to the child.	<ul style="list-style-type: none"> • Caregiver(s) refuse to allow county agency in the home or access to certain parts of the home. • Caregiver(s) refuse to allow county agency to see or speak with a child; do not inform county agency where the child is located. • Family is highly transient, family has little attachments (e.g., job, home, property, extended family) and/or there are other circumstances prompting flight (e.g., warrants, false identities uncovered, criminal convictions, financial debt) and behaviors suggests flight for the purpose of avoiding agency involvement. • Caregiver(s) has demonstrated behaviors of avoidance and/or flight • Caregiver(s) overt behavior prevents caseworker from assessing child's living condition. These behaviors include but are not limited to: refusing to talk to county agency, avoiding contact with county agency, making excuses for not participating, missing appointments, or other evasive, manipulative, or suspicious behavior.
14	Child is fearful of the home situation, including people living in or having access to the home.	The child's fear must be obvious, extreme and related to some perceived danger that the child feel; or experiences. Whatever is causing the child's fear is active, currently occurring, and an immediate concern of the child. Imminence applies.	<ul style="list-style-type: none"> • Child demonstrates extreme emotional and/or physical responses (e.g., crying, inability to focus, nervousness, withdrawal, fear of going home) indicating fear of the living situation or of people within the home. • Child expresses fear and describes people and circumstances which are an obvious and/or serious threat. • Child recounts experiences which form the basis for fear. • Child's fearful response escalates at the mention of home, people, or circumstances associated with reported incidents. • Child describes personal threats which seem clear, serious, and believable.
